EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David M. Hoffman on 23 October 2006, wherein an amendment to claim 9 was discussed in order to provide proper antecedent basis.

The application has been amended as follows:

Claim 9 has been amended to read:

9. The method of claim 1 wherein said calculating [selecting] weights comprises forming a combination of one or more parameters selected from the group consisting of a measure of the degree of arrhythmia of said signals, a measure of the degree of similarity or correlation between said first and second electromagnetic radiation signals, a measure of the degree of motion artifact by obtaining a ratio of a current pulse amplitude to the long-term average pulse amplitude of said signals, a ratio of a current pulse amplitude to the previous pulse amplitude of said signal, and a ratio of a current pulse period to that of an average pulse period of said signals.

Claim 10 has been amended to read:

10. A device for ensemble averaging signals in a pulse oximeter, comprising:

means for receiving first and second electromagnetic radiation signals from a blood perfused tissue portion corresponding to two different wavelengths of light;

means for obtaining an assessment of the signal quality of said electromagnetic signals;

means for calculating [selecting] weights for an ensemble averager from a continuous weighting function using said assessment of signal quality; and

an ensemble averager for ensemble averaging said electromagnetic signals using said weights.

Claim 26 has been canceled.

2. The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests, either alone or in combination, a method or device wherein weights are calculated for an ensemble averager from a continuous weighting function using an assessment of signal quality from two electromagnetic signals, in combination with the other claimed steps or elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Etsub D. Berhanu whose telephone number is 571.272.6563. The examiner can normally be reached on Monday - Friday (Every other Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on (571)272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
